What is AWS?

So, what is AWS? AWS is short for Advanced Wireless Spectrum. It's the latest wireless telecommunications band that MetroPCS is using in Las Vegas -and will use in Philadelphia, New York and Boston. AWS provides our subscribers with fast and reliable network coverage. AWS handsets operate in both AWS and 1X MetroPCS markets. This means a handset purchased in Las Vegas will operate in all other MetroPCS markets. However a non-AWS phone (1X phone) will not operate in Las Vegas unless TravelTalk is enabled. The TravelTalk fee for Las Vegas is \$0.49 per minute.
Our Current AWS Handsets:

- Samsung My Shot
- Samsung Spex
- UTStarcom 7126
- Huawei M328

Many more AWS handsets are on the way.
